

# FUTURELAND

## Next Generation Education

6 - 7 March 2023  
Trinity College Dublin

### ABOUT FUTURELAND

**Post-pandemic and facing crises in population displacement, rising inflation, soaring energy costs and ecological disaster, how exactly are we preparing our learners to handle an uncertain future?**

Education is increasingly being moved online – how ready are educators or their students? Are our curricula and pedagogies still relevant? How realistic is environmental sustainability, and education's role in it? How do we factor ethics and inclusion in our schools? Is future education focused only on the use of advanced technologies?

Futureland asks you to imagine a better world and propose educational solutions to achieve it. Come share the latest thoughts, knowledge, and ideas that can revolutionise the world as we know it.

**CALL FOR ABSTRACTS NOW OPEN**

### WHO SHOULD ATTEND?

Students | Teachers | Principals | Education Policy Makers | Education Department Officials | Education Experts and Consultants | Entrepreneurs | Technology Specialists | Curricula Developers | Everyone else

### WHY YOU SHOULD ATTEND?

This global event will help educational stakeholders prepare their students to handle a VUCA (volatile, uncertain, complex and ambiguous) future. At the same time, we celebrate extraordinary teachers and women educators inspiring their learning communities. Learn from future-minded school teams, experts, and thought leaders in special masterclasses, presentations and training sessions.

**EARLY BIRD  
DISCOUNTS**
