**Social Skills Development and STEM for a better life**

## About the Program

SOBER Social Skills Development and STEM for a better life program is co-founded by the by the Erasmus+ program of the European Union. Aim of the program is to create and implement a digital-based Complex Development Program and to offer methodology and training for teachers and special teachers, focusing on the basic skills development of underprivileged and SEN (special education needs) children.

SOBER Complex Development Program is dedicated to:

1. Children with special educational needs
2. Children at risk of dropping out
3. Children with disadvantages socio-cultura

By improving students' results and supporting key competencies and transversal skills, the **Complex Development Program** condition healthy development of the personality and strengthen the positive attitude towards school. The Complex Development Program focuses on skills development for students aged 6-14.
